## Projects

### Portfolio Website (React + Tailwind CSS)

Built a responsive personal portfolio website using React and Tailwind CSS to showcase skills, projects, and experience. Implemented reusable components, smooth navigation with React Router, and optimized UI for all devices.

### To-Do List App (React + Tailwind CSS)

Developed a task management application where users can add, edit, mark as completed, and delete tasks. Focused on state management with React hooks and styled with Tailwind for a clean UI.

### E-Commerce Website (Tailwind CSS)

A Designed and developed a fully responsive E-Commerce website UI using Tailwind CSS only. Created product listing pages, product details, shopping cart, and checkout UI with a mobile-first design approach. Focused on mastering modern CSS utility classes and responsive layouts.

### Amazon Home Page Clone (Tailwind CSS)

Recreated the Amazon homepage clone using Tailwind CSS only. Focused on implementing complex layouts, navigation bars, product grids, and responsive design. This project demonstrates attention to detail in pixel-perfect cloning and mastery of Tailwind utilities.

### 5. Weather App (React + Tailwind CSS)

Built a real-time Weather Application using React and Tailwind CSS, integrating a public weather API (OpenWeatherMap). Users can search cities and view temperature, humidity, and weather conditions. Implemented API integration, error handling, and responsive UI.
